# THE FEINSTEIN INSTITUTE FOR MEDICAL RESEARCH

The internationally-renowned Feinstein Institute for Medical Research is the research enterprise of the North Shore-LIJ Health System and is headquartered in Manhasset, New York. Through its focus on advancing science to prevent disease and its connection with the health system's hospitals and facilities, the Feinstein Institute pioneers discoveries to cure patients. The more than 800 Feinstein Institute scientists and 1,500 health system clinical researchers conduct more than 2,100 clinical research studies annually. This research sheds light on the underlying cause of disease and leads to the discovery of new treatments and diagnostics – important discoveries have already been made in cancer, inflammation, autoimmune disorders, Parkinson's, Alzheimer's, and many other diseases.
